

Small (Mini) Incubators

Automatic hobby incubators with smart technologies designed to hatch a wide range of poultry eggs which include quail, chicken, pheasant, duck, goose and swan. Suitable for hobbyists and enthusiasts.

Model: EHE-12T **R1895.00**
 Capacity :12 chicken/ 48 quail eggs
 Automatic egg turning, automatic humidity and temperature control

Model: EHE-24T **R2695.00**
 Capacity: 24 chicken/ 96 quail eggs
 Automatic egg turning, automatic humidity and temperature control

Model: EHE-48 **R2995.00**
 Capacity :48 chicken eggs
 Automatic egg turning, automatic humidity and temperature control

Model: EHE-152 **R3295.00**
 Capacity: 152 quail eggs
 Automatic egg turning, automatic humidity and temperature control

Standard Combination Incubators

Fully automatic combination incubators with smart technologies designed to hatch a wide range of poultry eggs which include quail, chicken, pheasant, duck, goose and swan.

**3 Year
Warranty**

Dual Compartment Incubators

The Dual Compartment model comes with 2 separate compartments, and is fitted with 2 doors one for the Setter and the other the Hatcher. This means one compartment can be accessed without interrupting the other. The water tray is located in the setter meaning the water stays clean always especially during hatching making this one of the most hygienic designs in the market today.

Setter

Hatcher

**3 Year
Warranty**

Model	Total Incubator Capacity	Setter Capacity	Hatcher Capacity	Power (W) Average	Dimensions LxWxH (mm)	Weight	Factory Price

Trolley Incubators

The trolley models are most suitable for a 21-day cycle production. The eggs are set in trays on a removable rotating trolley. After 18 days the trolley is removed from the incubator and all eggs transferred into hatching baskets. The baskets are loaded into the same machine for the remaining 3 days of the cycle for hatching to take place.

**3 Year
Warranty**
